

**The American Institute of Architects
Continuing Education Systems**
AIA/CES Registered Provider Program
Summary Handout

Provider: Residential Elevators Inc.	Length: 1 hour
Program #: REI 001	Credits: 1 LU
Program: Home Elevators	HSW: Yes

Description: This course provides an overview of the value of home elevators, planning for home elevator installation, and code considerations. In addition the program will include a leaning sheet for referencing in future planning.

Learning Objectives: Following the completion of this course the attendee should be competent in the following areas and able to:

- ❖ Identify benefits for installing a home elevator.
- ❖ List pre-planning options for how to accommodate for a future elevator in the design of a home.
- ❖ Understand design requirements for different types of residential elevators.
- ❖ Use the national standard ASME A17.1 Part 5 Private Residential Elevators to implement the code requirements for residential elevators.

Target Audience: Architects, specifiers, interior designers, owners and other design professionals. The ideal audience size can be 10-50 people. This program is basic and meets the needs of professionals at every experience level.

Facilitator Qualifications: All Residential Elevator, Inc. CES facilitators have been trained on CES guidelines and presentation skills. In addition, they receive continuous in-depth training in the field and are considered industry experts.

How Taught: The CES facilitator utilizes a PowerPoint or slide presentation to provide an in-depth overview of appropriate planning for home elevator installation. This is an interactive session that encourages feedback and questions. In addition, a “fill-in-the-blank” worksheet will be distributed to help reinforce the learning objectives. The program will conclude with a summary of code compliance and applicable regulations awareness.

AV Needs: Electrical power and screen for PowerPoint presentation

Costs to Participant: None
